Elliot Buckland-Weir

Junior Security Analyst

Nottingham, UK | Elliot@elliotweir.co.uk | elliotweir.co.uk

Professional Profile

Junior Security Analyst with two years in a dedicated security role and more than five years across IT operations, networking, endpoint support and security. Experienced in investigating security alerts, implementing protective controls, remediating vulnerabilities and coordinating with an external SOC.

Internal go-to for Microsoft Entra identity and access queries and subject matter expert for Mimecast email security. Previous experience as a Senior Desktop Technician and a Managed Technician supporting ten schools provides a practical foundation in troubleshooting, customer service and understanding the operational impact of security decisions.

Major Achievements

- Personally designed, tested, reviewed test results and deployed Microsoft Entra Conditional Access policies into production.
- Became the team’s Mimecast subject matter expert, owning configuration, optimisation and troubleshooting.
- Acted as an internal lead contact for the third-party SOC/SIEM service, reviewing, investigating and escalating security events.
- Played a key role in taking Microsoft Intune from initial setup to live service within three months.
- Created policies and procedures governing hardware compliance and external sharing across SharePoint Online, Microsoft Teams and Entra B2B.
- Produced the IT Security Executive Report and developed Jira workflow automation to improve operational visibility and reduce manual work.
- Implemented BeyondTrust PAM; currently rolling out BeyondTrust Privileged Remote Access (PRA) and Microsoft PIM for highly privileged roles.

Key Skills

Microsoft Security & Endpoint Management

- Microsoft Intune, Autopilot and Apple Business Manager
- MobileIron-to-Intune migration
- Device compliance, secure enrolment and CIS benchmark hardening

Identity & Access Management

- Entra ID, Conditional Access and MFA
- Privileged Identity Management, Privileged Access Management and BeyondTrust Privileged Remote Access (PRA) rollout
- External collaboration controls across SharePoint, Teams and Entra B2B

Security Operations

- Security alert investigation and external SOC coordination
- Phishing analysis and incident response support
- Vulnerability remediation and patching
- Microsoft Sentinel, Darktrace, Varonis and WAF rules

Email Security

- Mimecast administration, policy design and troubleshooting
- Targeted Threat Protection and misaddressed email protection
- SMTP relay, SPF and mail-flow security

Infrastructure & Stakeholder Support

- Windows endpoint support and networking troubleshooting
- Complex technical escalations and root cause analysis
- Customer service and collaboration with users, suppliers and system owners

Governance Automation & Reporting

- Security policies and standard operating procedures
- Executive reporting and investigation documentation
- Jira workflow automation and phishing simulations

Professional Experience

SOCOTEC — Junior Security Analyst

September 2024–present

- Review and investigate alerts using Microsoft Sentinel, Darktrace and Varonis, coordinating with the external SOC and internal teams on validation, remediation and escalation.
- Act as an internal lead contact for the third-party SOC/SIEM service, investigating reported activity and obtaining context from users and system owners.
- Investigate suspicious emails and impersonation attempts using sender information, headers, links and message context; remove malicious messages and apply blocking controls where appropriate.
- Investigate endpoint detections using available file, execution and reputation evidence to assess whether activity is malicious or legitimate.
- Investigate identity and access issues using Entra sign-in information and Conditional Access configuration, documenting findings for escalation.
- Serve as the Mimecast subject matter expert, owning configuration, optimisation and troubleshooting, with vendor escalation where required.
- Design and implement Gateway Policies, Targeted Threat Protection and misaddressed email protection; design SMTP relay solutions and improve mail-flow security, including SPF configuration.
- Personally designed, tested, reviewed test results and deployed Microsoft Entra Conditional Access policies into production.
- Reviewed identity controls and documented considerations for assessing Conditional Access changes before enforcement.
- Implement CIS benchmark hardening across servers and endpoints and manage vulnerability remediation and patching activities, supporting Cyber Essentials and Cyber Essentials Plus preparation.
- Implement privileged access controls using BeyondTrust Privileged Access Management (PAM). Currently rolling out BeyondTrust Privileged Remote Access (PRA) and Microsoft PIM for highly privileged roles.
- Deploy and maintain web application firewall rules to address identified web application threats.
- Produce the IT Security Executive Report, presenting metrics, trends and risk information for senior leadership.
- Create policies and procedures covering hardware compliance and external sharing across SharePoint Online, Microsoft Teams and Entra B2B; explain sharing processes to Service Desk colleagues.
- Design and deliver phishing simulations, and develop Jira workflow automation to reduce manual work and improve visibility of security tasks.
- Played a key role in progressing Microsoft Intune from initial setup to live service within three months, contributing to endpoint configuration, compliance and secure enrolment. Experience includes Autopilot, Apple Business Manager and MobileIron-to-Intune migration activities.

SOCOTEC — Senior Desktop Technician

2023–September 2024

- Acted as an escalation point for complex infrastructure, endpoint and application issues, performing root cause analysis to address recurring problems.
- Administered access across on-premises and cloud systems and supported endpoint security, mobile device management and secure software deployment.
- Contributed to phishing campaigns and VPN rollout, providing technical guidance to colleagues and working across teams to resolve operational issues.

Nottingham City Council — Managed Technician

2021–2023

- Delivered on-site first- and second-line support across ten schools, troubleshooting endpoint, networking and application issues with stakeholders and suppliers.
- Managed mobile devices and secure configurations, supported organisational security and data protection procedures, and explained technical issues clearly to school staff.

Education & Qualifications

Professional development

- TryHackMe Cyber Security 101 (SEC1) — achieved August 2026
- TryHackMe Certified Pre Security (SEC0) — achieved June 2026
- TryHackMe Security Analyst Level 1 (SAL1) — achieved October 2026
- Microsoft Applied Skills
  - Get started with identities and access using Microsoft Entra - achieved
  - Administer Active Directory Domain Services - achieved
- Planned after Terraform: AZ-104, SC-200; SC-300 later. Not awarded.
- Terraform Associate - current learning priority; not awarded.

Nottingham College 2017–2020

- Level 4 System Support & Peripherals — Merit
- Level 3 System Support — Distinction
- Level 2 System Support — Distinction

Additional Information

Maintain Atlas with working Proxmox, VLANs and Wazuh; Terraform provisioning is planned. Publish security research on Defender for Office 365 and SharePoint/Entra B2B sharing controls.
